

Eleven Quick Tips for Finding Research Data

The Challenge:

Considering the vast amount and variety of data are made available, finding relevant data to meet a research need is increasingly a challenge. Over the past decades, science has experienced rapid growth in the volume of data available for research - from a relative paucity of data in many areas to what has been recently described as a data deluge.

What is the solution?

The Data Discovery Paradigms IG output offers eleven quick tips that researchers can follow to more effectively and precisely discover data that meets their specific needs. The articles include an list of useful resources and examples that can be easily leveraged by all types of users.

Produced by: Data Discovery Paradigms Interest Group
